

YOUR #1 CHOICE FOR COMPRESSED GAS CYLINDER COMPONENTS

American Cap Company is the world's leading manufacturer of compressed gas cylinder components. For over 30 years we have provided cylinder caps, collars, flanges, foot rings, lids, neck rings and other components to insure the safety of Industrial, LPG, CNG and Specialized Gas cylinders. We take pride in serving our customers Worldwide.

PLASTIC VALVE GUARD

PRODUCT USE:

Plastic Valve Guard is designed to provide valve protection, open access and ease of cylinder handling. This type of guard is primarily used on cylinders weighing less than 110 lbs. The guard is available in two different thread sizes & 4 different plain bore sizes to match OEM cylinders or ACC adapter rings for cylinders without neck rings.

KEY FEATURES:

- Finger grips molded into handle provide better ergonomic handling of small cylinders
- Proprietary resin formulation protects the guard against Ultra Violet light deterioration
- Permanently attached to cylinder either by threading or using snap ring or snap ring – adapter ring combination
- Tag hole
- Drop tested to meet the requirements of DOT 49 CFR, CSA B340, & ISO 11117
- Made in the USA

OPTIONS:

- Colors available
- Custom Logo available
- Thread Sizes: 3.125-11 & 3.500-11²
- Plain Bore Sizes: 2.27", 2.41", 2.65" & 2.90"
- Kits with adapter rings & snap rings to fit cylinders without neck rings
 1. Valve Guard passes DOT seven foot drop test with 110 lb. cylinder
 2. 3.500-11 is a non-stock item
